**VS ENVI<sup>®</sup> FLEX**

**Revised  
VERSION**  
from Q3 2023

# OUTSTANDINGLY STYLISH IN EVERY DRAWER.

Waste sorting is a matter of great importance and has a fixed place in our lives. The ideal waste sorting system fits in standard drawers of all types and sizes.

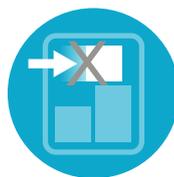

Thanks to its precisely fitting frame, nothing escapes and the bins are held securely in place, ensuring that waste disposal remains a tidy and hygienic pleasure for a long time to come.

Significantly fewer parts are installed in the revised version of our tried-and-tested waste sorting system. The impressive result: VS ENVI® Flex is even more economical, environmentally friendly and lighter than the previous version.

## Convenience in daily use

Hygienic waste disposal

Containers do not budge while opening and closing

Additional storage surface & odour protection, thanks to integrated metal cover plate

Easy removal and emptying

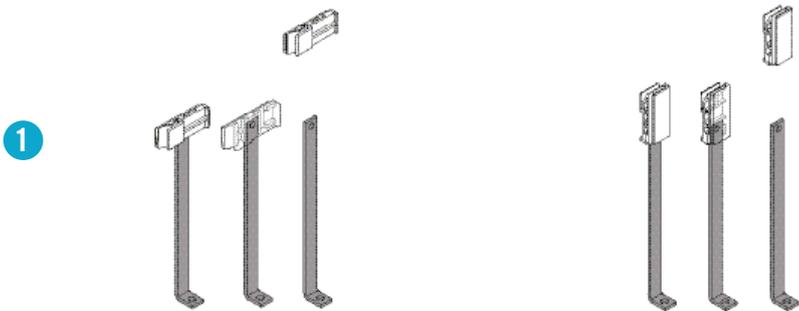

## ATTRACTIVE OFFER FOR RETAILERS

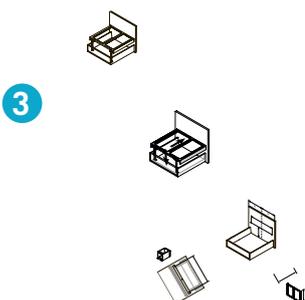

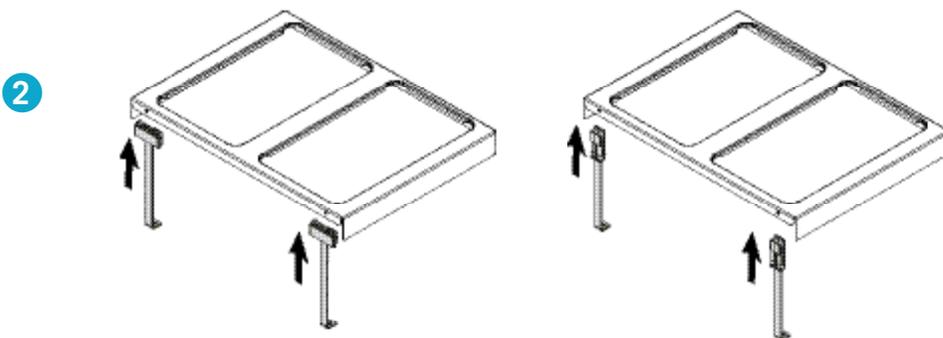

- \ Greater selection of variants than previous model
- \ Larger container volumes
- \ Attractive customer price

## MAXIMUM EASE OF ASSEMBLY

- \ Fewer complex components and less weight
- \ Quick and easy to install
- \ Frame is installed using supports on the rear base and front of the drawer

The support bracket clip can be inserted horizontally or upright. This reduces the number of parts to a minimum.

ENVI

**VS ENVI<sup>®</sup> FREE**

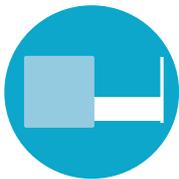

**NEW**  
*Bin holder*

# MAXIMUM FREEDOM FOR YOUR WASTE SORTING SYSTEM

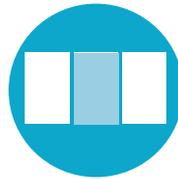

Do you want to house your waste sorting system flexibly and compactly? Preferably in its own drawer, instead of an entire cabinet? Without compromising on hygiene or the uniform look of a systematic solution? Then VS ENVI® Free gives you maximum freedom to place your waste sorting system wherever

it best suits you, and configure it for your own convenience. A unique and practical feature of our portable waste system is that it can be installed anywhere with no effort. This also applies to the version with a non-slip mat, as well as the latest version with the VS ENVI® Free Tray bin holder.

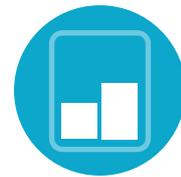

## VS ENVI® Free – the advantages at a glance:

**Space-saving** – instead of an entire cabinet, a conventional box drawer is all you need (600, 800, 1000 mm width, 216 and 256 mm container height)

**Integrated solution** – no additional seams or joints, thanks to integration in the existing structure

**Uniform look** – matching container design for all types of waste

**No installation effort** – no screws or other measures necessary

**Individually configurable** – different container sizes and divisions available to choose from

**Free positioning** – both the nonslip mat and new VS ENVI® Free Tray bin holder can be positioned any way you like

**Versatility** – as well as collecting waste, containers can be used as cleaning buckets, or to store petfood or cleaning products

# FOR EXTRA CONVENIENCE, HYGIENE AND STURDINESS: VS ENVI® FREE TRAY

The VS ENVI® Free Tray bin holder is an upgrade for the VS ENVI® systems that makes the bins even easier to use inside a drawer. The bin holder is simply placed in the drawer, and the bins placed in the compartments provided. Thanks to the holder, the bins remain securely in place, even when the drawer is opened or closed with force. The drawer itself re-

mains clean, and the removable shell is easy to clean. An additional slot can be used to store bin bags or cleaning materials. All bins can also be used to store cleaning utensils or petfood, or as cleaning buckets. Each bin can also be equipped with a lid, and for the 6L bin, a bio lid is also available.

## **The new bin holder brings yet more attractive benefits to the VS ENVI® Free series:**

- More convenience – all containers automatically remain evenly spaced and in the same configuration; the additional compartment can be used to store bin bags or cleaning utensils
- Increased hygiene: the drawer remains clean, and the inside of the bin holder is easy to clean
- Secure hold – the containers remain firmly in place, even when subjected to jerky movements

## Variants

The new VS ENVI® Free Tray is suitable for all types of drawers with a width of 600, 800 or 1000 mm. The bins are available with a height of 216 mm or 256 mm, allowing the system to be

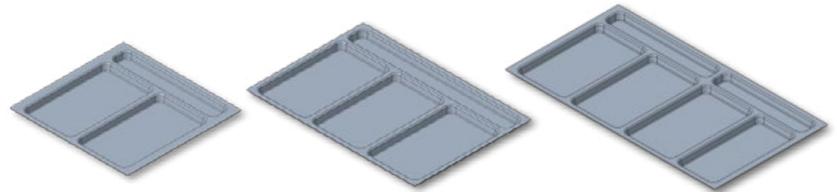

integrated in conventional drawers. The depth of the VS ENVI® Free Tray is 480 mm. However, the bin holder is customisable, making it suitable for all conventional drawer systems.

ENVI

**VS ENVI<sup>®</sup> WATER**

# TWO IN ONE: YOUR UNDER- SINK CABINET, REORGANISED

Intelligent water treatment systems with special fittings are rising in popularity. Quooker, the tap that can do everything, is the definitive example of this. But then where do you put your waste sorting system, which often goes in the cabinet under the

sink? To maximise this valuable space, Vauth-Sagel has developed an innovative solution that kills two birds with one stone – a water reservoir and convenient waste solution, combined in one system.

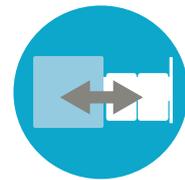

## The advantages of the VS ENVI® Water combined solution at a glance:

Flexibly organised,  
convenient waste solution

VS ENVI® Space waste sorting system,  
optionally available with one 22-l container or  
two 10-l containers

Smooth, durable sliding technology

Additional shelf and odour protection,  
thanks to metal cover plate

Optimal use of space in the  
cabinet under the sink

Robust, precise construction  
Made in Germany

# ALL TOGETHER IN A COMPACT SPACE

The combined solution is suitable for Quooker\* and comparable water treatment systems with the same dimensions.

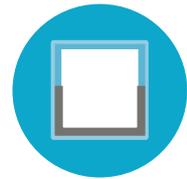

## Convenient installation with guaranteed stability

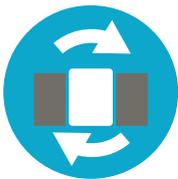

Quick, easy and flexible installation

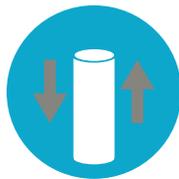

Integrated hose and cable management

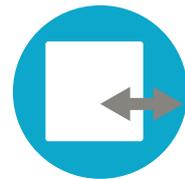

Secure fastening on the side wall and subfloor of the base cabinet; the system remains securely in place, even when waste bins are pulled out

Positioning of the reservoir to the left or right of the waste sorting system

Simple replacement of the CO<sub>2</sub> cylinder

Can also be connected in front of the cabinet using optional extension hoses.\*\*

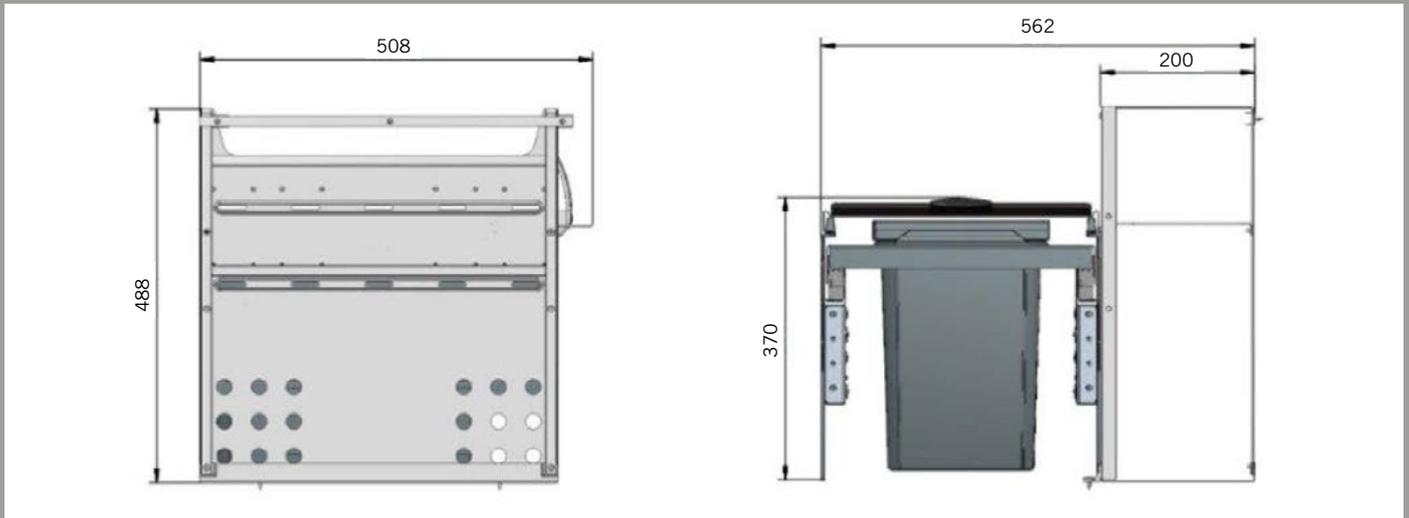

\* The Quooker is not part of the system  
\*\* The extension hoses required for this can be ordered directly from Quooker.

## Technical details

Base cabinet width: 600 mm

Installation height of ENVI system: 362 mm, Quooker system: 488 mm

Installation depth of ENVI system: 464 mm, Quooker system: 500 mm

TOP

**VS TOP<sup>®</sup> DOWN**

# PUTTING IT ALL AT YOUR FINGERTIPS.

The VS TOP® Down is perfect for anyone who wants to take things to the next level without overreaching themselves because it does all the hard work for you. This innovative, unique hinge concept by Vauth-Sa-

gel makes it easy to access a space which was previously difficult to reach. Ergonomic advantages are not its only impressive feature: the lowering mechanism also boasts an eye-catching design.

So good, it impressed survey respondents and the jury of the Kitchen Innovation Award. For its functionality, innovation, product benefit, design and ergonomics, the VS TOP® Down was awarded the Golden Award Best of the Best in the Kitchen Furniture and Equipment category.

■ VS TOP® WALL UNITS \ VS TOP® DOWN

# FOR ALL WALL-MOUNTED CABINETS

Maximum equipment as a two-storey solution with a width of 90 in the colour variant lava. Shown here in combination with a folding door.

Minimum equipment as a single-storey solution with a width of 60 in the colour variant stone. Shown here in combination with a side-hinged door.

■ VS TOP® WALL UNITS \ VS TOP® DOWN

# OPTIMAL USE OF SPACE

Thanks to the intelligent pull-out mechanism, the space underneath the shelf remains usable while avoiding collisions with the kitchen utensils below.

■ VS TOP® WALL UNITS \ VS TOP® DOWN

# EVERYTHING WITHIN REACH

Sliding the shelf back in is just as simple. The clever steel shelf moves back into its original position with no effort or additional unlocking required using a damped mechanism supported by spring force. A gentle pull on the handle –

which is invisible from outside and integrated into the design – is all it takes for the smart sheet-steel shelf to glide down from the wall cupboard, making its contents easy to reach. The epitome of universal design.

■ VS TOP® WALL UNITS \ VS TOP® DOWN

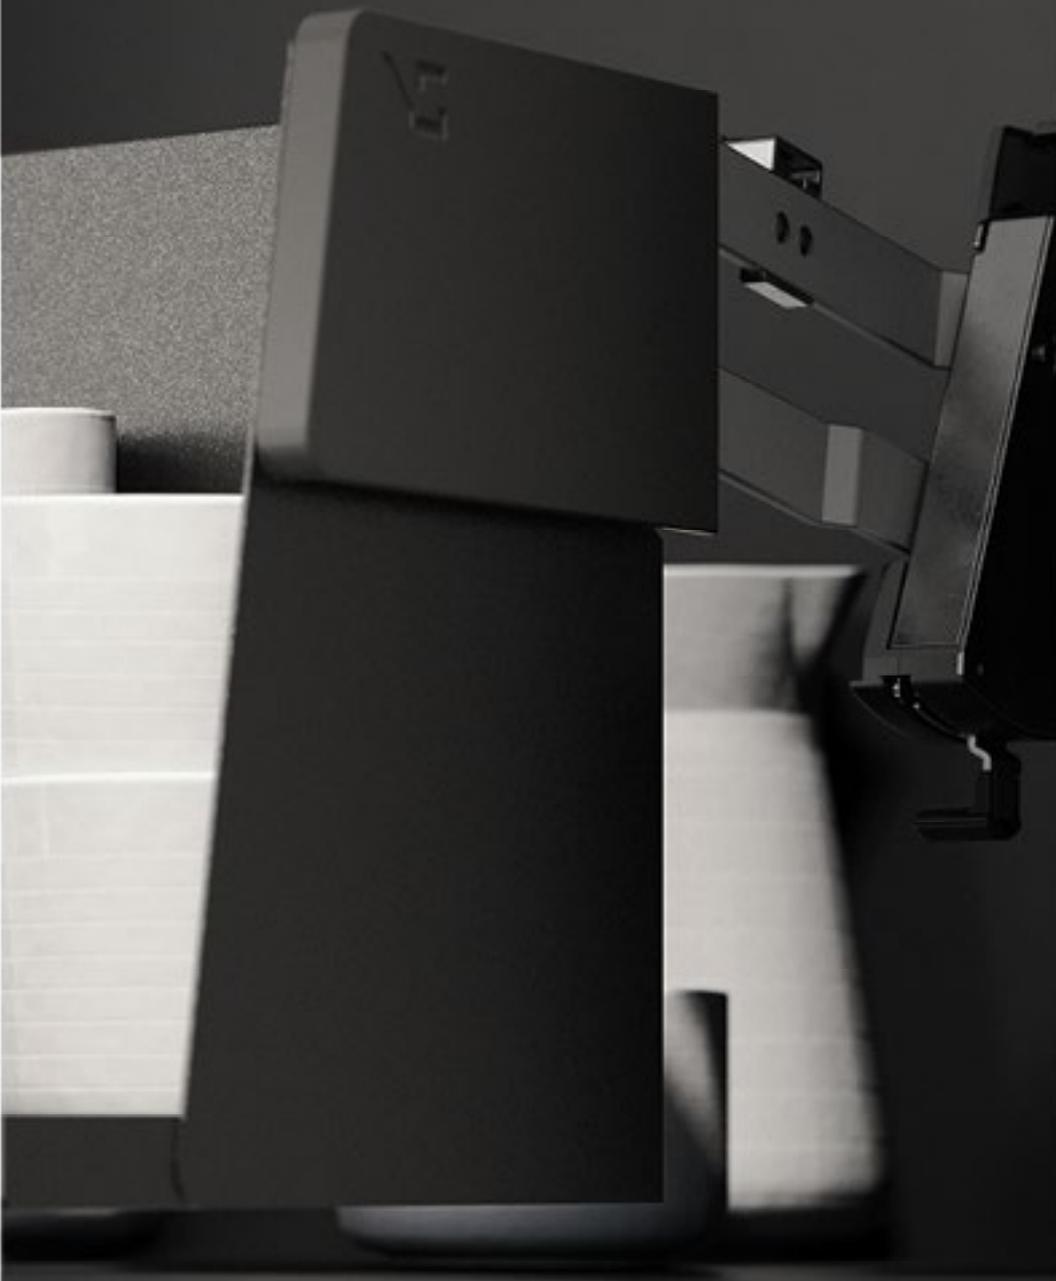

# CONVENIENT SPRING FORCE ADJUSTMENT

**Operating properties can be adjusted to the load by changing the spring force**

Adaptable to any load: the convenient, tool-free spring force adjustment offers up to five settings, which optimally coordinate the load and movement of the unit.

■ VS TOP® WALL UNITS \ VS TOP® DOWN

# INTERIORS AND EXTERIORS BLEND INTO ONE

Anyone who thinks that hinges are just the nuts and bolts of a design should think again. The aesthetics of this minimalist, flat steel design perfectly complement the external kitchen design.

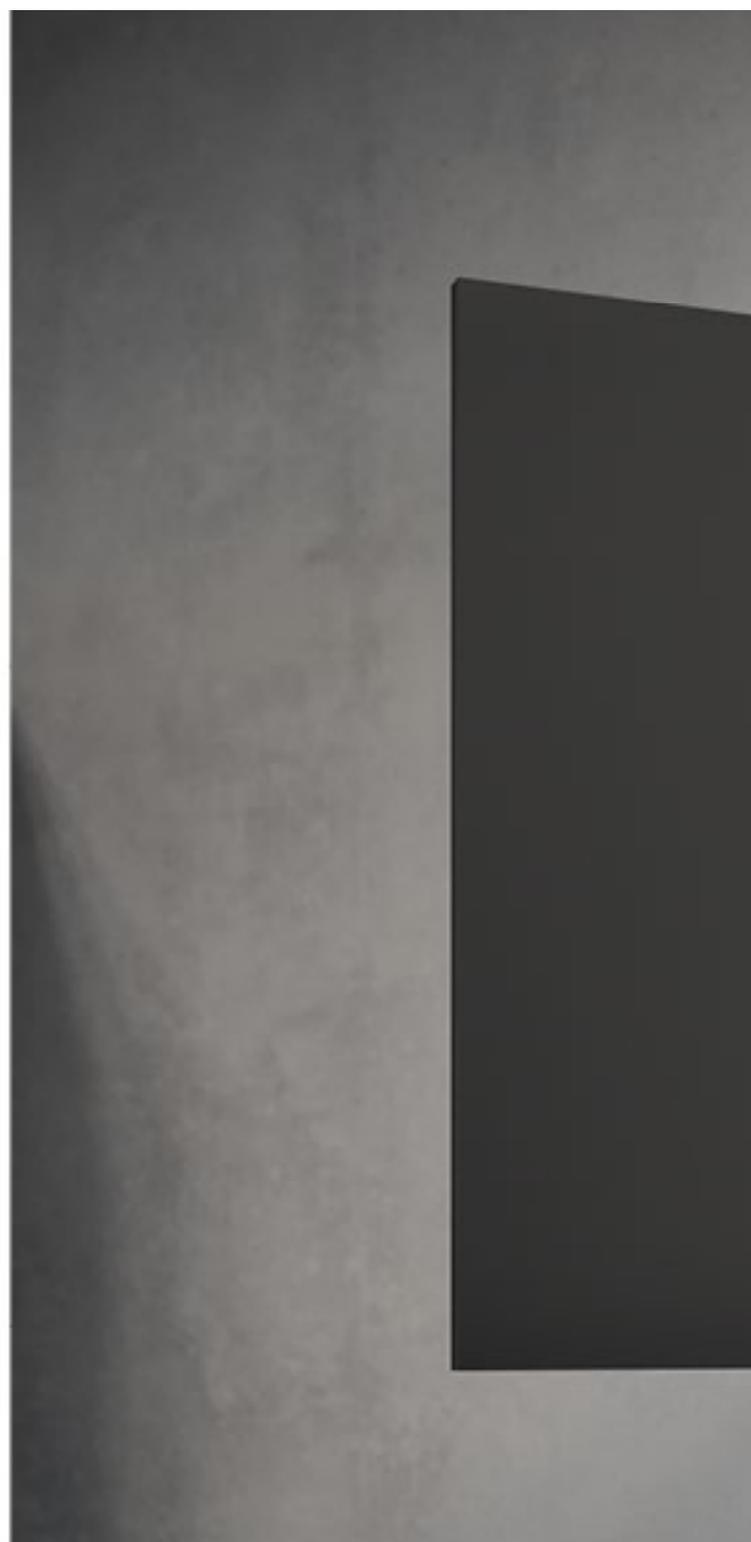

■ VS TOP® WALL UNITS | VS TOP® DOWN

■ VS TOP® WALL UNITS \ VS TOP® DOWN

# INDIVIDUALITY FO

For those who prefer a completely individual solution, the fitting set can also be purchased separately and combined with a base of your choice. This gives you freedom to customise the material, colour and width.

## Benefits at a glance

- ↘ Elements can be positioned freely irrespective of **TAL®** oder **SUB®** category
- ↘ Available in the heights **H1**, **H3** and **H5**
- ↘ For door widths **C 450**, **C 500** and **C 600**
- ↘ **VS Rack Plus**: with force dispersal, as a stand-alone and as a fixture solution

# A FAMILY WITH MANY FACES

The door-coupled VS Gate products are already among the best systems in the world currently in production. The modular tall-cabinet solutions bring fresh perspectives to any kitchen. Developed for maximum storage space and easy access, the modular system sets new standards both in terms of comfort and in its design.

The real benefit of VS Gate is its opening mechanism. It automatically brings all stored items to the user in one

go and facilitates an optimal overview.

The new design – reduced to the essential – is characterised by invisible connections. At the same time, unnecessary plastic parts were dispensed with to improve sustainability.

An array of application variants and cross-selling options are available with just a few elements as a design combination.

C 500

C 600

VS TAL® Gate Pro

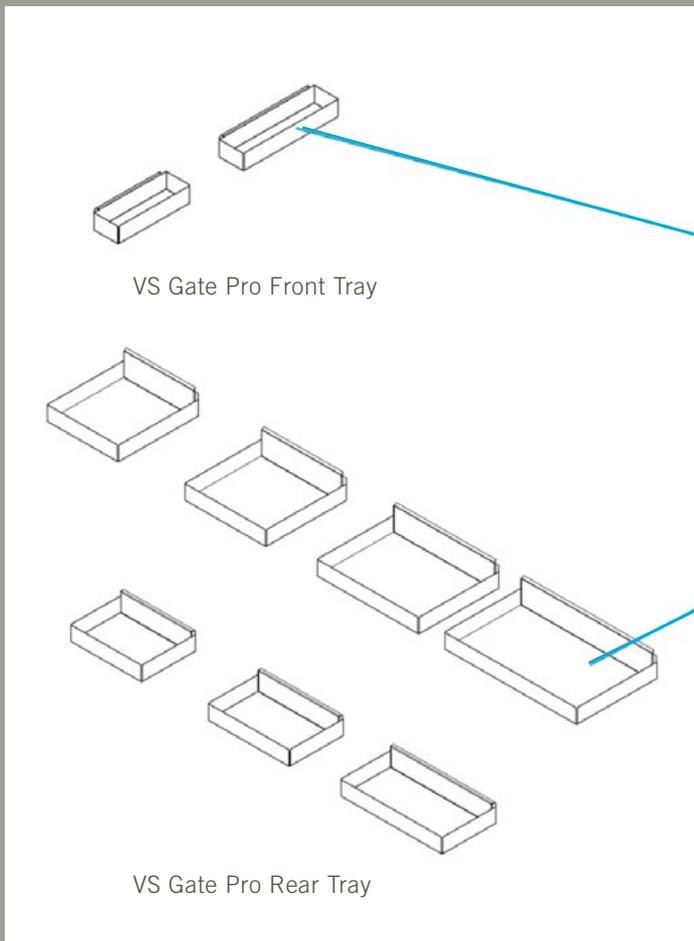

VS TAL® Gate

# THE FOUNDATION FOR OVERVIEW AND ORDER

- VS TAL® Gate Tray
- VS TAL® Gate Pro Rear Tray
- VS TAL® Gate Pro Front Tray

The rear- and front-mounted tray elements offer various possible combinations. Depending on the positioning and dimensions of the **VS TAL® Gate Pro**

variant's front frame, use of the depth-reduced Rear Trays is possible alongside full-depth classic Gate Trays in the lower section.

# EXTRA VERSATILE – EXTRA FLEXIBLE

## VS Gate Flex

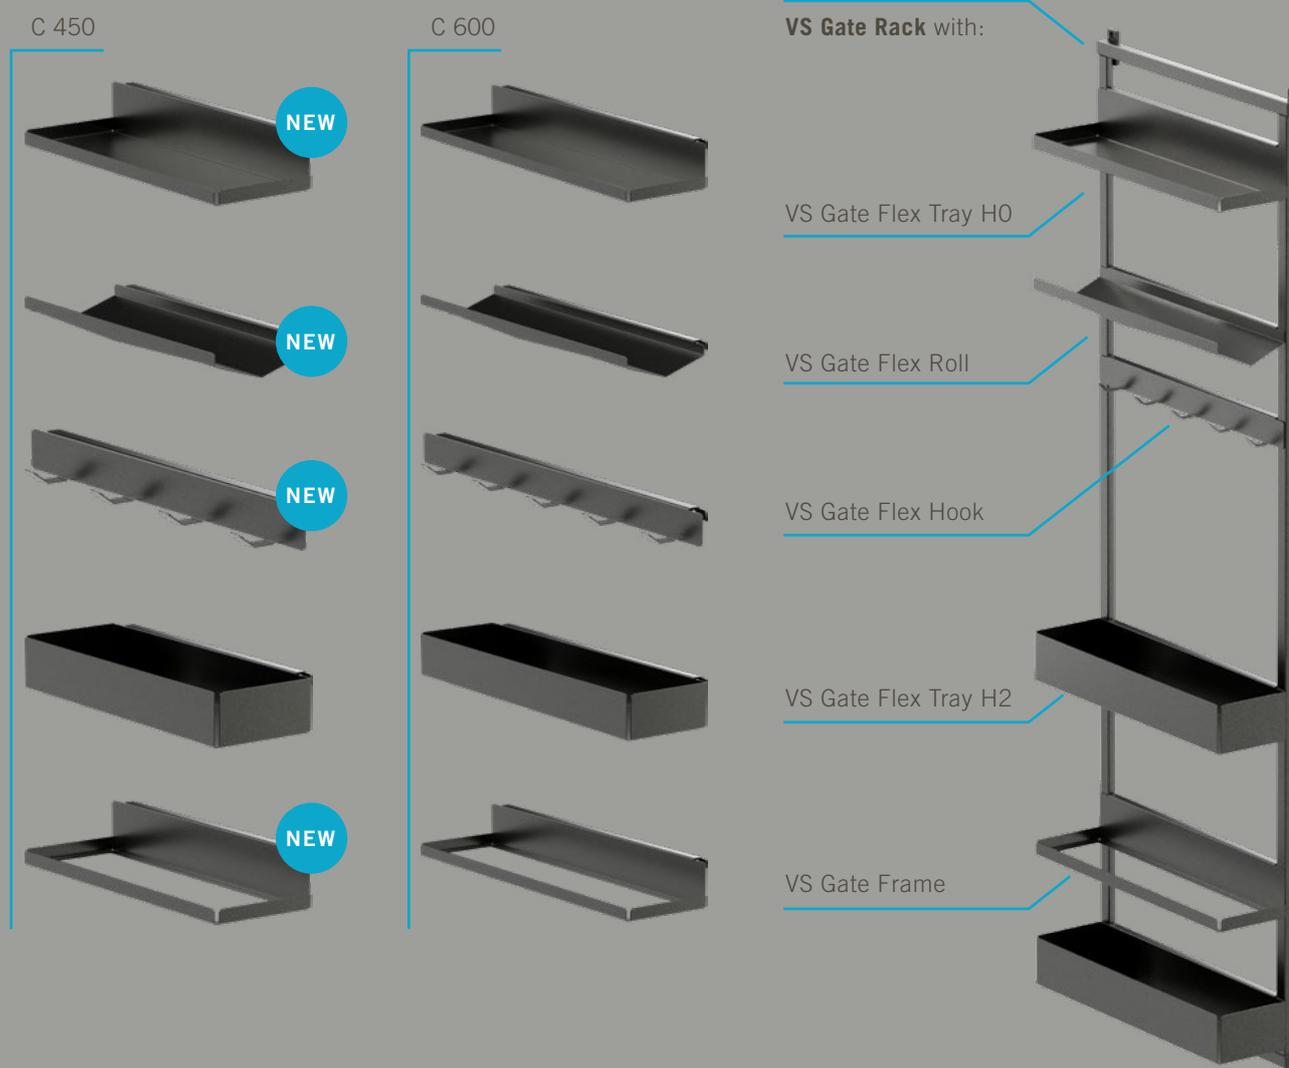

Each of the **4 neuen VS Gate Flex Elemente** (Tray H0, Frame, Roll, Hook) supplements the basic tray **VS Gate Pro Front Tray** for the widths C 450–500 and C 600. They offer a wide range of fantastic interior organisation possibilities.

The **VS Gate Pro Front Tray** and the **VS Gate Flex** elements integrate into the new modular frame concept both inside

and outside without visible connections.

Can be used for both the **VS Gate Rack** and the **VS TAL® Gate Pro**.

The design and dimensions are coordinated with the **VS ADD® Box** and **VS ADD® Separator** elements to form a modular unit and offer a variety of options.

POSSIBLE APPLICATIONS \ VS GATE FAMILY

# APPLICATION IN DETAIL

## VS Gate Rack (450-500)

The frame of the **VS Gate Rack** can also be perfectly positioned inside the corpus in the narrow variant (**C 450-500**).

The depth is designed such that it can be fixed behind the hinge level for conventional interior depths. It retains the feature of flexible equipment options.

Design and tray depths have been developed for interior organisation using the **VS ADD® Box** and **VS ADD® Separator**. They underscore the system's new modular characteristics.

## VS Gate Rack wall installation

The simplest application for the **VS Gate Rack** is wall mounting on the wall brackets, which were specially designed for this purpose.

The extra-thin frame boasts a special profile. This allows the invisible locking of flexible tray elements without additional plastic adapters, thus underscoring the minimalistic design.

The 64 mm grid steps facilitate tray element positioning that is perfectly adapted to the storage space. They can be adjusted straight-forwardly and without tools.

VS Gate Rack

## VS Gate Rack plus

Based on the same frame as for the **VS Gate Rack**, slide bearings with flexible force dispersal are used in the corpus rather than a wall retainer. This facilitates placement on the inside of the door.

The variant for **C 450**, **C 500** or **C 600** is used depending on the width of the door. It offers secure storage on the inside of the door without putting too much strain on the hinges.

VS Gate Rack plus

## VS TAL® Gate

The tried-and-tested **VS TAL® Gate** fixture is retained as the main module. The door follower ensures the automatic exit motion of the trays when the door opens.

In the **VS TAL® Gate**, the trays are retained to the full depth. The new maxi tray C 750 is based on the tried-and-tested C 600 **TAL® Gate Frames**. It takes into account the current trend for wider door fronts.

C 600

C 750

## VS TAL® Gate Pro

Combining the **VS TAL® Gate** and **VS Gate Rack Plus** results in the **VS TAL® Gate Pro**, the most complete system solution.

In the complete design, the modular tray elements in the **VS Gate Pro Front Trays** and the depth-reduced tray **VS Gate Pro Rear Tray** are used.

And of course, the modular principle is applied here too, meaning that the front trays can also be fitted with **VS Gate Flex** elements.

VS TAL® Gate Pro

## VS TAL® Gate Pro reduced height

A further application variant can also be created with a reduced frame height, offering a convenient system solution.

In the complete design, the **VS Gate Pro Front Trays**, are used, along with the depth-reduced **VS Gate Pro Rear Trays** in the upper area, and the full-depth **VS Gate Tray** in the lower portion of the cabinet. The result is even better access to the lower storage level.

VS TAL® Gate Pro - reduced height

## VS Gate Rack VS TAL® Gate VS TAL® Gate Pro H1 variants

All **VS Gate** tall-cabinet solutions can also be used in base cabinets in the low **H1 variant**.

Compatibility with the VS Gate Flex components and the **VS ADD® Box** and **VS ADD® Separator** modules is also assured for individual interior organisation.

VS TAL® Gate Pro, H1 variant

# THE WELL-THOUGHT-OUT BASE CABINET PULL-OUT

With the new **VS SUB® Larder** base unit, another flexible storage solution is now available within the Larder modular system - ideal for those who love it when everything in their kitchen is thoughtfully stored away.

## Benefits for the user

### Cushioning and self-closing

The integrated cushioning mechanism ensures smooth and silent use.

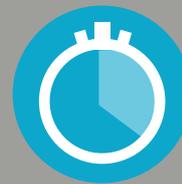

### Convenient access

Brings all contents out of the cupboard. Everything can be accessed easily from both sides.

### Complete overview

When the door is opened, all of the cupboard's contents can be seen at a glance.

### Time saving

Direct access to all contents. No rummaging about – this saves time and spares your nerves.

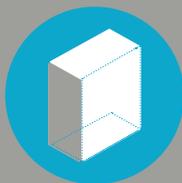

### Individual height adjustment for trays

Simply adapt the VS SUB® Larder to your individual requirements.

---

## Benefits for the installer

### Floor and side assembly possible

### Easy Fit

Simple frame assembly on the runners and to the front.

### 3D front adjustment

Facilitates the convenient and simple adjustment of the front.

### Lower stock keeping

In combination with VS TAL® Larder trays, baskets, designs.

# AN ASTONISHING AMOUNT OF STORAGE SPACE

The two larder solutions **VS SUB® Larder** (base cabinet) and **VS TAL® Larder** (Hochschrank) (tall cabinet) offer all kinds of storage space. They form the foundation for a well-thought-out, clearly arranged kitchen and utility room.

The trick: the tray dimensions in both cabinets are identical, meaning that they can be equipped with the same elements. The high-quality look of the powder-coated surfaces also contributes to a tidy overall impression. Trays and baskets are available in the design collections Classic, Saphir, Premea,

Scalea, Planero and Essentio. With minimal space requirement, you get two fully fledged products with countless variations.

But that isn't all. In combination with the new **VS Larder Flex trays**, tall and base cabinets can be personalised still further and tailored to the desired purpose. Whether food, kitchen utensils or cleaning products – everything can be seen at a glance and accessed from both sides. The construction set is rounded off with the storage solution **VS ADD® Box**, which ensures order within the system down to the last corner.

# FLEXIBILITY BEGINS WITH FLEX

With the flexible modular solution **VS Larder Flex**, Vauth-Sagel brings order to the cupboard interior. Both in the kitchen and the utility room, **VS Larder Flex** facilitates tailored solutions for typical storage requirements in the stove, oven, sink or washing machine areas.

The individual trays can be combined into different theme sets and make the new base cabinet pull-out.

**VS SUB® Larder** or tall-cabinet **VS TAL® Larder** into a perfectly adapted storage solution.

Two basic elements play a crucial role here: the storage trays – or baskets if desired – and the frame. Using the **VS Larder Flex Clip**, trays and baskets can be fitted to the desired height straightforwardly and without tools.

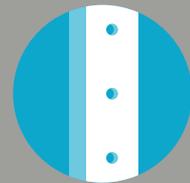

## Benefits, VS Larder Flex

Front and back can be used in different ways

Various trays for different applications

Hole pattern for simple adjustment to various heights

Compatible with VS TAL® Larder and VS SUB® Larder

For kitchen and utility area, frame customisable with filling

Modular coordination with VS ADD® Box and VS ADD® Separator

# SPACE-SAVING VERSATILITY

With the **VS Larder® Flex** elements, tall and base cabinets become true space savers. A number of components are available for this purpose.

## The basic elements

The storage tray **VS Larder Flex Tray** in two heights, H0 & H2, serves as a storage board with double-sided access and is designed to integrate the **VS ADD® Boxen**. The boxes are form-fitted and are completed by the back contour to form a unit. The magnetic separating element **VS ADD® Separator** can be used to add additional divisions in the depth. The material, proportions and finishes are perfectly coordinated.

The frame **VS Larder Flex Frame** fulfils a wide variety of functions. Among other things, it serves as a lateral holder and tip protector above the trays, e.g. for baking trays, chopping boards, step ladders and more.

In addition, the frame can be transformed into a flush-mounted tray and be further customised with the insertion of 19-mm-thick standard wood composites.

ADD

**VS ADD<sup>®</sup> BOARD**

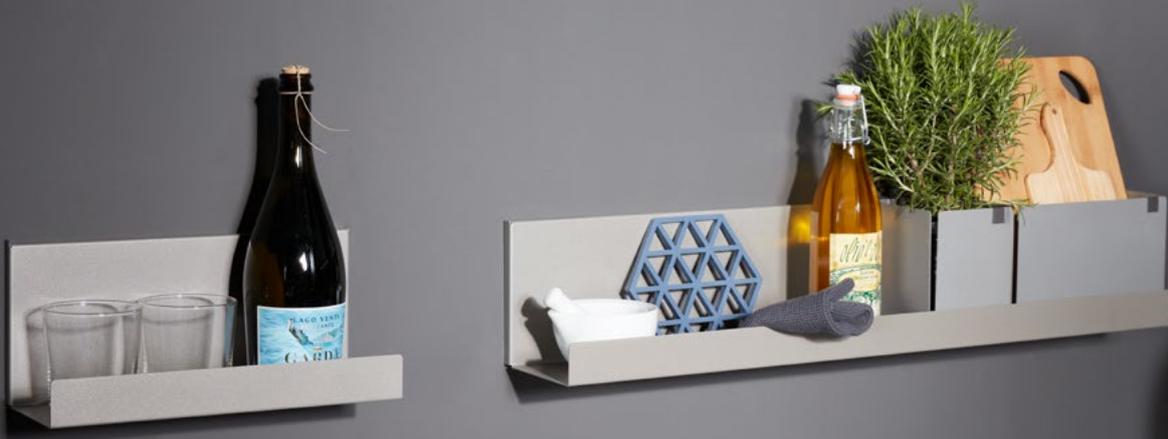

# EVERYTHING ON BOARD. ANYWHERE.

VS ADD® Board is a line of multi-purpose designer shelves for all living areas. Display everything you want to be seen. Even the shelf is an elegant eye-catcher: with the wall fitting hidden, it fits seamlessly into your interior design. Keep things

tidy on the shelf with the VS ADD® Box and VS ADD® Separator in a matching design. The power-coated steel and minimalist shapes make these three “organisers” a genuine dream team.

Elegant and practical:

# THIS STORAGE SOLUTION IS OPEN TO ANYTHING.

Whether you use it as an alternative bedside table, hang it in the kitchen as a spice rack or a shelf for cookbooks, or use it to store cosmetics in the bathroom: The applications are as individual as they are diverse and the VS ADD® Board is a versatile, customisable solution that creates

space for decoration and organisation anywhere. As well as speaking the same design language as the VS ADD® Box und VS ADD® Separator, it has dimensions that are tailored perfectly to the organisation solutions. The result is a dream team for tidiness and easy accessibility.

The VS ADD® Board provides open storage for everything you want to keep to hand in the bathroom

For stylish lounges:  
the VS ADD® Board  
with invisible fixings

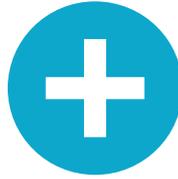

### All the advantages at a glance

Floating design

Use as a decorative feature or for anything you want to keep to hand

Extra storage space

Can be combined with the VS ADD® Box and VS ADD® Separator

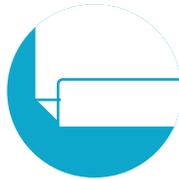

For the kitchen, bathroom, utility room or lounge

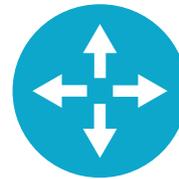

Powder-coated, bevelled sheet steel, without visible welding or connecting elements

Maximum weight load 5 kg

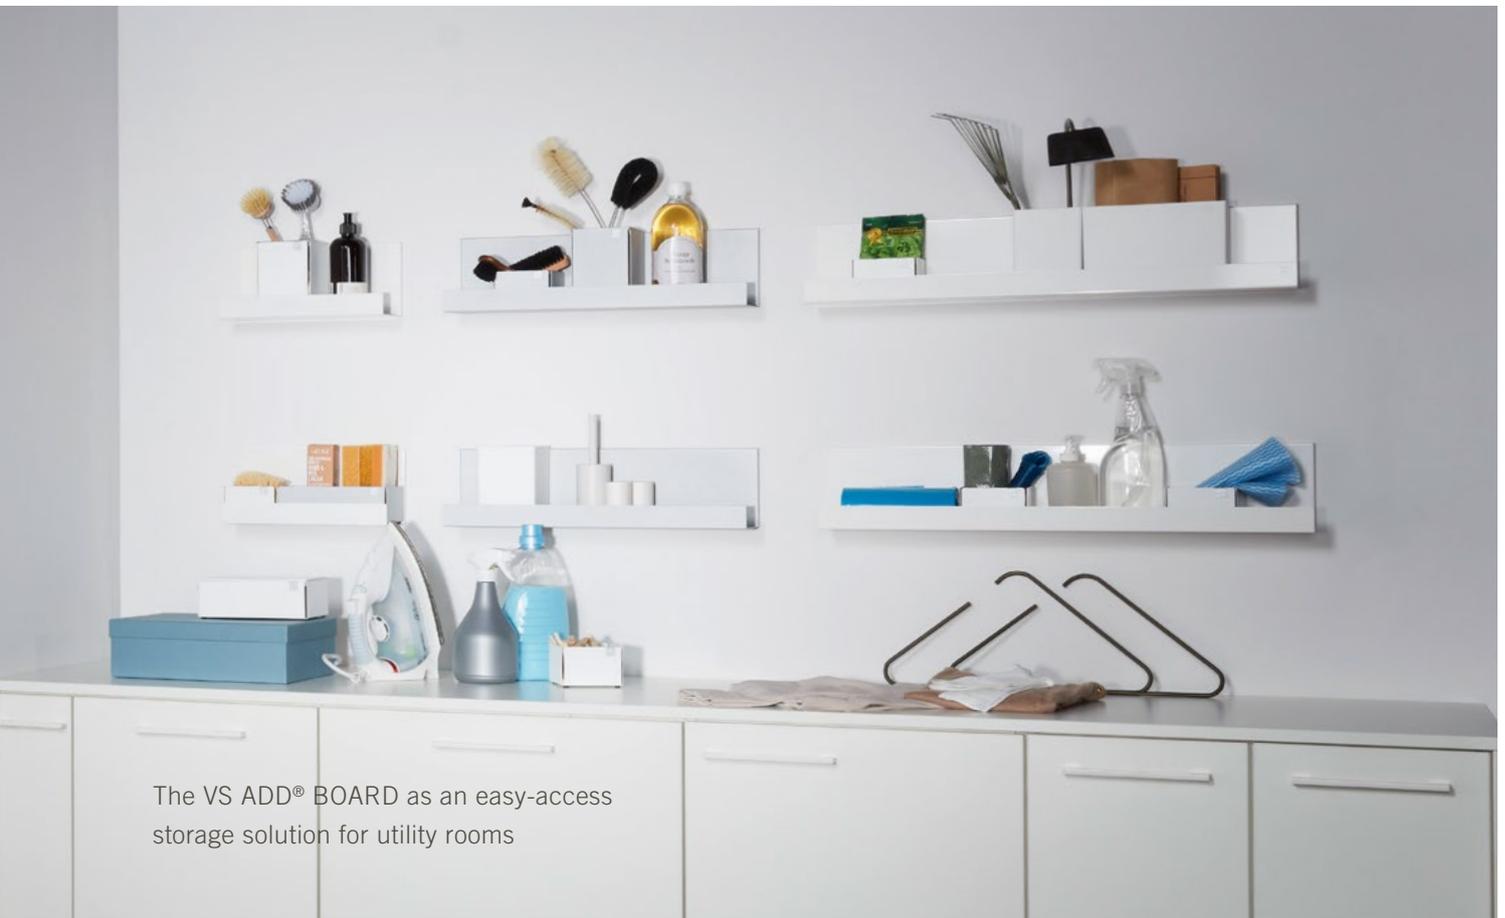

Raised front edge to prevent boxed and stored items from slipping

Simple, invisible fixing with 2D adjustment system and locking mechanism

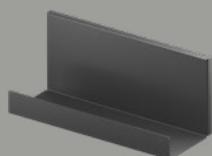

Simple, invisible wall mounting

The VS ADD® BOARD as an easy-access storage solution for utility rooms

**VS ADD<sup>®</sup> BOX**

# BEAUTIFULLY TIDY, INSIDE AND OUT

The VS ADD® Box is more than just a box: It is the smallest building block in the Vauth-Sagel inner organisation system, which makes the functionality of our storage space solutions even more individual – precisely fitting, tailor-made, and not confined to the limits of the cabinet interior.

The VS ADD® Box creates space for the little things in life in every part of your home. It looks particularly good on VS ADD® Board shelving or as an inner compartment of the Planero® and Essentio shelf variants.

The VS ADD® Box is the ideal addition to the VS ADD® Flex, shown here in the VS SUB® Larder

**VS ADD<sup>®</sup> SEPARATOR**

# PERFECTLY POSITIONED FOR ORGANISED INTERIORS.

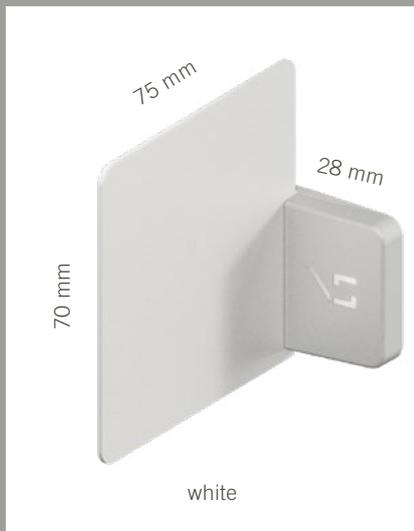

The VS ADD® Separator is a magnet for order. Dividing up our designer shelves has never been easier with this smart separator. Fully adjustable, it gives you endless options for all areas of the home. Two integrated magnets hold it

securely in place and the rubber lining on the inside stops it scratching the surface. The VS ADD® Separator is perfect with the Planero® and Essentio models: the same material and matching minimalist design.

VS

WASH

**VS WASH®**

# LAUNDRY TO GO

The VS WASH® is the neat solution for dirty laundry. With our laundry system, dirty laundry can finally be sorted, stored and transported not only neatly, but also completely out of sight. The concealed drop is perfectly integrated into any utility room. Technically and visually, VS WASH® is based on the proven waste separation systems of the VS ENVI® range, creating a uniform look for both recycling and laundry solutions. The

new laundry hampers in a unique variety of types are perforated to ensure optimal air circulation. The perforations are even rounded on the container interior, making a unique contribution to the gentle handling of the laundry. Thanks to the handle, the way to the washing machine is easier than ever before – even with two laundry hampers at once.

## VS WASH® System

## VS ENVI® System

A single system for laundry and recycling. The different types of use are defined by the containers used.

Handles make it possible to carry up to two containers at the same time

Gentle even on delicate laundry thanks to rounded walls

## CONSISTENT USE OF MATERIALS

Essentio is characterised by its floating design. The monochrome collection stands out for its consistent use of materials in high-quality, bevelled sheet steel with a clean, linear design language.

◀ VS TAL® LARDER

## REDUCED TO THE ESSENTIALS

The closed shelf elements are reduced to the essentials. This pared-down design is where “Essentio” gets its name. The delicate metal rail ensures optimal utilisation of the space. This creates space for individual organising and storage solutions, and is compatible with the flat design of other interior organising systems.

## THE ESSENTIALS AT A GLANCE

- \\ Closed metal shelf variant, made of bevelled sheet steel, in a pure and timeless design
- \\ Uniform look on the interior
- \\ Aesthetically reduced to the essentials
- \\ Thin walls to maximise interior space
- \\ Uniform, high-quality, robust powder-coated surface
- \\ Rail height 7 cm
- \\ Includes non-slip mat
- \\ Designed & made in Germany

# LIVING AND

WOOD AT THE HEART OF AMERICAN KITCHENS

## TRADITIONAL DESIGN AT THE HEART OF AMERICAN COUNTRY KITCHENS

Traditional cuisines continue to be just as popular as ever. The Ligano design line ensures a consistent look from the outside in, with elegant storage solutions based on warm woods such as maple and birch complementing the classic style of the kitchen fronts perfectly. Subtle metallic highlights add a contemporary twist.

GERMAN  
ENGINEERING  
INSPIRED BY  
AMERICAN TASTE

The sheer elegance of the Ligano design really steals the show at first sight, leaving the technology behind it to blend discreetly into the background. This is all part of what makes the everyday use of our sophisticated storage solutions all the more enjoyable. The stable, precise and reliable construction means every available space in the kitchen can be used comfortably and conveniently. Even during installation, the familiar Vauth-Sagel quality never fails to impress, as the entire assembly process can be completed in no time.

Combining traditional aesthetics with functional convenience designed in Germany, the Ligano line from Vauth-Sagel offers an attractive upgrade to the popular wooden design of American country kitchens.

## THE LIGANO ESSENTIALS AT A GLANCE:

- \ German design and engineering inspired by American style
- \ Storage space design for traditional and modern American kitchens - Subtle metallic highlights for a contemporary twist
- \ Harmonious designs with complementary metal accents within the individual product categories
- \ High-quality CI branding
- \ High-quality inner compartment technology
- \ Flexible inner compartments with VS SUB® & VS TAL® Pantry
- \ No unwelcome structural beams
- \ Uniform veneer appearance
- \ Compatible with all Face Frame and Frameless variants
- \ Easy plug & play unlocking of the floor-mounted products
- \ 3D front adjustment for all products with front connection

The Ligano collection at a glance:

▲ VS SUB® RACK

The VS SUB® Rack is a base unit with adjustable, easy-to-mount shelves. It offers flexible and adaptable storage space in a harmonious design and blends in seamlessly with traditional American kitchens. As for its unique stabiliser, this provides stability and support at the top thanks to its flexible and easy-to-fit adjustability.

▲ VS COR® SUSAN KIDNEY

This classic Lazy Susan solution is now also available in the new Ligano design. The wooden shelves are characterised by a unique contour, whose diagonal form echoes the typical Vauth-Sagel design while also forming a pleasantly comfortable handle element. An opening in the front area provides a useful view of the contents, and the high contour at the back offers reliable protection against tipping. What's more, not only is the entire assembly both quick and straightforward, but the shelves are easy to clean.

▲ VS ENVI® BMT

For a consistently uniform look inside the cabinets, the popular VS ENVI® BMT waste system is also available as part of the Ligano collection. The system is supplied pre-assembled and can be installed on the guides without the need for tools. It doesn't get more straightforward than that.

▲ VS SUB® PANTRY

This elegant pantry system complete with Ligano wooden shelves harmonises beautifully with any traditional kitchen. The floor-mounted system is fitted with a cushioned self-closing mechanism, and the shelves can be easily removed without the need for tools. Just like the European portfolio, there will also be flexible VS Pantry Flex modules for the American market that are compatible with the VS TAL® Pantry and VS SUB® Pantry, allowing the system to be adapted to the respective use.

The following products are also available in the Ligano design:

- VS COR® Flex
- VS TAL® Pantry
- VS Pantry Flex
- VS SUB® Side
- VS TOP® Down

# FAVOURITE LOOK

## A FAVOURITE IN AMERICAN KITCHENS

Specially designed for the tastes of the North American market, Scalea is a highlight in any kitchen around the world. The timeless design, featuring an open wire rail and closed wooden base, upgrades the interior of your cabinets and offers sturdy, spacious storage shelves to securely house all the items that you use in the kitchen every day.

### ALL THE FACTS ABOUT SCALEA AT A GLANCE:

- \\ Timeless design in classic American base colours
- \\ High-quality, elegant rail made of flat and round wire
- \\ Closed wooden base for retention of stored objects
- \\ Extra large baskets, tailored to American cabinet depths

## THE NEW PLATINUM POWDER-COATED SURFACE

The new Platinum colour variant adds a new shine to the Scalea design line. This shiny, scratch-proof and impact-resistance powder-coated surface for the rails is an environmentally friendly alternative to conventional chrome-plating.

## ECO-FRIENDLIER THAN CHROME

- \\ The alternative to conventional chrome surfaces in the vein of the Vauth-Sagel sustainability strategy
- \\ No solvents or heavy metals used in production, thanks to environmentally friendly powder-coating process
- \\ 35 % less material consumption

## ADVANTAGES OF POWDER-COATED SURFACES:

- \\ Modern, durable and rust-free surface
- \\ High impact and scratch-resistance
- \\ Highly uniform surface, thanks to multi-layered structure
- \\ Easy to clean, as dirt and grease do not adhere or penetrate

THE FOLLOWING VAUTH-SAGEL PRODUCTS CAN BE FITTED WITH SCALEA SHELVES:
